TUBERCULOSIS
PATIENTS

EMERGENCY RESPONSE

Our plans for the future

To rebuild the medical infrastructure destroyed by the russians, to adjust logistics and all processes

To ensure effective drug supply chains

To achieve 95-95-95 goals. These are our global UNAIDS goals, we have accepted this challenge and are looking forward to complete this mission

To implement the public health approaches in all state policies

Continuous review and improvement of national legal database according to WHO guidelines, international good practices and evidence-based medicine

To completely overcome the stigma and discrimination of people living with HIV

To ensure the stability of services and financial stability of medical care

To strength the human resources and to provide employees with opportunities for continuous professional development

To implement the electronic healthcare system and other IT innovations in medicine

To completely eliminate vertical transmission of HIV
